

NovaTech Data Verification Log

Student Name: Gajendra Awasthi

Date: 09/14/2026

Instructions

Query each pre-indexed knowledge base using Quick Chat. For each question, record the expected answer (from the data dictionary), Q's actual response, and whether they match. Minimum 6 entries (2 per data knowledge base).

Verification Log

#	Knowledge Base	Question Asked	Expected Answer	Q's Actual Answer	Match?	Notes
1	NovaTech CRM Deals	How many total deals are in the CRM deals dataset?	63,420 rows (total records in joined dataset)	63,420 total deals	✓ Yes	Q correctly counted all rows; also noted that duplicates may exist due to joins with marketing/support data
2	NovaTech CRM Deals	What are the distinct deal stages?	Won, Lost	2 distinct deal stages: Won and Lost	✓ Yes	Q accurately identified both deal stage values
3	NovaTech Marketing Campaigns	How many total leads are in the marketing campaigns dataset?	2,240 unique leads	2,240 leads (unique lead_id count)	✓ Yes	Q used COUNT(DISTINCT lead_id) to return the correct unique lead count
4	NovaTech Marketing Campaigns	What are the distinct campaign channels?	Direct Mail, Email, Organic Search, Paid Social, Partner Referral	5 distinct channels: Direct Mail, Email, Organic Search, Paid Social, Partner Referral	✓ Yes	All 5 channels matched exactly
5	NovaTech Support Tickets	How many total support tickets are in the dataset?	3,000 tickets	3,000 total support tickets	✓ Yes	Exact match with the known record count of the support tickets dataset
6	NovaTech Support Tickets	What are the distinct priority levels?	Critical, High, Medium, Low	4 distinct levels: critical, high, low, medium	✓ Yes	All 4 priority levels matched; Q returned them in alphabetical order (lowercase)
7	NovaTech Support Tickets	How many support tickets have critical priority?	50 critical tickets	50 support tickets with critical priority	✓ Yes	Q filtered correctly on priority = 'critical'

Cross-Check

Pick one fact from above and confirm it independently in the QuickSight dataset preview.

- **Fact verified:** Total number of support tickets = 3,000
- **Chat said:** 3,000 total support tickets
- **QuickSight shows:** 3,000 rows in the novatech_support_tickets dataset (confirmed via SQL: `SELECT COUNT(*) FROM support_tickets`)
- **Consistent?**  Yes — Both Q Chat and the QuickSight dataset return the same count of 3,000 support tickets.
